

# Economic Incentives and Compliance Report

INDIANA ECONOMIC DEVELOPMENT CORPORATION

*For the Reporting Period January 1, 2005 – June 30, 2013*

**A MESSAGE FROM:**

**VICTOR P. SMITH**  
**SECRETARY OF COMMERCE**

**ERIC DODEN**  
**PRESIDENT**

Dear Fellow Hoosiers:

The Indiana Economic Development Corporation, which was formed in 2005 to succeed the Department of Commerce, continues to excel in new and innovative ways. We're a team of professionals: sales managers, marketing specialists, strategists, and financial analysts to name a few. We are the State that Works.

Our strategy has been a resounding success. Since 2005, as the following report shows, we've played an integral role in bringing new businesses to Indiana, resulting

in thousands of new jobs for Hoosiers and an improved standard of living.

How do we do that?

This report will give you the details so you are better able to understand how your tax dollars are being used to make your State better for you and your family.

Our goal is to support and encourage our business economy, in alignment with the goals outlined in Governor Pence's Roadmap for Making Indiana the State that Works. See the Roadmap at [www.in.gov/gov/2530.htm](http://www.in.gov/gov/2530.htm). These include increasing private sector employment, attracting new investment especially in certain sectors (manufacturing, agriculture, life sciences and logistics), and improving our Hoosier workforce.

To accomplish those goals, we work with established contacts, and we cultivate new contacts. We attend trade shows across the country in targeted industries, such as life sciences and IT. We work with our international offices – in six countries -- to encourage foreign investment into the State of Indiana.

Indiana is a great place to live and work. With our Right to Work laws and declining corporate income tax rates, we've got an attractive climate for economic growth.

A part of creating an attractive climate is the ability of our State to offer financial incentives. We allocate tax credits to companies which hire and invest, and we extend grants to companies which train our Hoosiers. When we make an offer of financial incentives, we provide a memorandum of

understanding, stating how many jobs the company plans to create, at what wage level, and by what date. After the letter is signed, the company submits data about its employment. We verify the data, and then we enter into an official agreement describing the tax credits and grant money that can be earned in exchange for performance.

Typically, the agreements are long-term, usually up to 12 years in duration. After all, we don't give tax credits and grant dollars without a genuine commitment in return from the companies. We view these projects as long-term partnerships designed to create incentives for companies to remain here in Indiana.

During the term of the agreement, we require companies to let us know how their plans are

performing and if they are meeting or exceeding expectations. They are required to do this once a year – with detailed information about jobs, wages, and investment. The closer the company is to meeting its goals, the more tax credits the company receives.

You should know that a tax credit is **not** a dollar being taken out of the State treasury. It's a decision that we will not require a tax to be paid in exchange for the economic benefit. So, when a company is certified \$100,000 in tax credits, if the company properly claims the credit on its tax return, the State of Indiana would not get \$100,000 that it would otherwise be entitled to receive in the form of tax revenue.

Some credits work more like cash – EDGE is like this – because it is tied to withholdings that companies

collect. Other credits work only against tax liability – like HBI – which means the company has to have taxable income on its tax return (the company is profiting, not losing) before the company can claim the tax credit. This measure ensures that the State is not at risk for something the company cannot pay. In that way, the credits create a greater return as the companies hire more Hoosiers, and more dollars are flow into our communities to support housing, retail, schools, and more. This return on our investment becomes a part of our economy and enhances our lifestyle, making this the State that Works.

Please contact us when you have a question about what we do or how we work. We are here to help, and we appreciate your thoughts and ideas to help keep us as the State that Works.

Sincerely,

*Victor P. Smith*  
Secretary of Commerce

*Eric R. Doden*  
President

## INTRODUCTION

The Indiana Economic Development Corporation has expanded the compliance report in further efforts to increase transparency of its operations. Transparency provides an opportunity for greater public participation and allows for continued improvement.

This report covers the grants, loans, and tax credit programs administered by the IEDC. This report provides information required by Indiana Code § 5-28-28, amended effective July 1, 2013. This report canvasses active project information as far back as 2005, which was the inception of the IEDC as the successor the Indiana Department of Commerce.

The IEDC has adopted these improvements in response to suggestions made in an independent review conducted last year. This review also suggested that the IEDC use operational terms that are consistent and easy to understand.

As a result, this report includes easy-to-read descriptions of the programs included within this report, pertinent details about

them, followed by the supporting data and a glossary that explains the meaning of each of the terms used frequently throughout the report.

The report will be posted on the IEDC's transparency website, <https://transparency.iedc.in.gov/Pages/default.aspx>, in the "Additional Public Information" section. This posting is consistent with Indiana Code 5-28-6-2(b)(8), 5-14-6-4. In addition, the portal contains real-time data, so please refer to it for updates to the information contained within this report.

The IEDC invites suggestions and feedback on how we can continue to improve. Please visit us at [www.iedc.in.gov](http://www.iedc.in.gov).

## SECTION 1: JOB CREATION INCENTIVES

This section reports on active incentive agreements for job creation incentives programs for the time period from **January 1, 2005 to June 30, 2013**, except where otherwise noted. This page and the next contains preliminary information about Jobs Realization, Recaptures, and Claimed Credits and Paid Grants. The following pages contain summary information by specific program followed by the Incentive Recipient Spreadsheet containing specific information by recipient.

### Jobs Realization.

One of the measurements of the IEDC's success is the new job growth in Indiana. The IEDC doesn't create jobs – companies do – and the IEDC strives to encourage companies to continue to create jobs. One of the initial steps in this process is to bring a new project to Indiana. When a company is ready to announce that it will be coming to Indiana, we issue a press release about those plans and describing how many new jobs are expected to be created.

This is good news. But sometimes plans do not happen. There are times when newly-announced projects are not finalized in contractual commitments, meaning that the jobs may happen anyway or may not happen at all. When there is no contractual commitment, we do not have a reliable method to count the jobs created because without a contract, we cannot require companies to report their annual job growth. Also, when contracts come to an end early – which may happen, e.g., when

companies decide they do not want the incentives -- we cannot report whether those jobs are still present because we no longer have a contract.

In reporting our jobs realization rate, we have taken into consideration that we can only accurately report those jobs reported to us each year by recipients under active contractual agreements. Under new legislation effective July 1, 2013 (IC 5-28-28-6(1)(C)), this is what we are required to report. Consequently, our jobs realization number is based upon job figures reported to us by recipients under agreements active as of December 31, 2012.

In contrast to previous years' method of calculating our realization rate, this year's method does not include projects with pending contracts. The reason is that such projects do not yet have a contractual commitment for job creation, so we cannot require companies to report the jobs information. More significantly, such

projects are not final commitments and are subject to negotiation until a final contract is signed and may still be in the planning stages of development.

For contractual commitments since January 1, 2005, that also had an annual reporting requirement at least through December 31, 2012, there were 78,403 cumulative jobs created (we had expected 85,368 jobs). This results in a realization rate of 91.8%. Crowe Horwath, acting independently, pulled information from IEDC's source system that matched the IEDC's jobs realization of rate of 91.8%.

This means that for contracts entered into since January 1, 2005 which were active as of December 31, 2012, and/or remain active, the recipient companies created 91.8% of the expected jobs as they had promised. We believe this shows that companies surviving the current challenging economy are also thriving in Indiana's business climate.

### Recaptures

Per IC 5-28-28-6(1)(D), this report must include the total amount of the recaptured incentives for the reporting year and the total number of recipients. A recapture may occur when the recipient is not meeting contractual obligations and repays the Paid Amounts and/or forgoes the Certified Amounts (see Glossary), in whole or in part. During calendar year 2012, the IEDC received \$1,560,345 in cash and \$2,978,917 in forgone certified tax credits, for a total of \$4,539,262 from 23 recipients. Once repayment is made, the recipient is compliant with its contract. The majority of these contracts are no longer active, though some contracts are modified in line with changed expectations.

If the incentive agreement remained active during the last fiscal year, it will be reflected in the data sheet below. Adjustments effectively decreasing the Paid and Certified Amounts (see Glossary) are not in the data sheet, and may be found on the IEDC's Transparency Portal.

### Claimed Credits and Paid Grants.

During calendar year 2012, the recipients of EDGE, EDGE-R, and HBI tax credit incentives claimed \$50,810,926 on their tax returns. (This figure was reported by the Indiana Department of Revenue pursuant to IC 5-28-28-6(1)(E).) During calendar year 2012, we have paid a total of \$5,219,996 in SEF grant funding, primarily workforce development funds, usually paid on a dollar-to-dollar match with recipient companies, for training Hoosiers and improving their skills for the workforce.

## EDGE

### **Economic Development For A Growing Economy Tax Credit – for Job Creation (IC 6-3.1-13)**

The Economic Development for a Growing Economy (“EDGE”) tax credit program is Indiana’s primary job creation incentive. The purpose of the EDGE Program is to provide a tax credit to recipients creating net new jobs in Indiana.

EDGE awards are calculated based on the number of jobs being created and the wages associated with those jobs. An EDGE award is released on an annual basis over a period of up to ten years after a company first certifies to the IEDC its net new Indiana payroll achieved for that year. Employment figures included in this report represent the total number of employees anticipated to be hired over the term of the incentive agreement.

The Certified to Date amount included in this report represents the portion of

the total Contract Amount which has been earned by the recipient to date, based in part on the proportion of the Expected New Jobs by the Most Recent Calendar Year which have occurred. In the event that actual new employment differs from the employment level indicated in the recipient’s application for incentives, or incentive agreement, the annual certified amount is adjusted on a pro-rata basis to reflect actual performance. In no event can the total benefit received by a recipient exceed the total award amount indicated in its incentive agreement.

As the chart on the following pages shows, for active contracts since January 1, 2005, we have awarded \$763,688,297 in EDGE tax credits, and of that amount, only \$154,690,651 in tax credits have been certified thus far. (In addition, during fiscal year 2012-2013, the IEDC made awards of EDGE totaling \$163,081,023. This information satisfies the budget committee report required in IC 6-3.1-

13-28, amended effective July 1, 2013, for the amount of credits “granted” during the immediately preceding fiscal state year. “Granted” means those projects for which the IEDC has contracted for an award amount.)

By dollar value, the EDGE tax credit is the most-used job creation incentive and a highly effective tool available to encourage expansion and new ventures.

**Economic Development For A Growing Economy Tax Credit – for Job Retention  
(IC 6-3.1-13)**

The Economic Development for a Growing Economy (“EDGE-R”) tax credit program for job retention is an incentive that is rarely offered. The purpose of EDGE for retention is to encourage a company to remain in Indiana and not relocate, thereby keeping existing jobs in the State of Indiana. There are limited funds available for these. The company is

required to remain in Indiana to keep the incentives. Sometimes, a retention project is mixed with a job creation project, so that a company must retain and grow. These are reflected in the Employment Numbers in the chart. As the chart on the following pages shows, for active contracts since January 1, 2005, we have awarded \$3,841,132 in EDGE-R tax credits, and of that amount, only \$997,353 in tax credits have been certified thus far.

## HBI

### Hoosier Business Investment Tax Credit (IC 6-3.1-26)

The Hoosier Business Investment Tax Credit (“HBI”) program is generally used to incentivize job creation, though the overall purpose of the program is to encourage recipients to make significant new capital investment in Indiana, spurring economic development.

The credit amount is equal to a percentage (up to 10%) of a company’s eligible capital investment in Indiana. The HBI award may be carried forward for a period of up to nine years. Investments must be approved in advance by the IEDC in order to be eligible for the credit, and a recipient must first submit documentation showing that the investment has been made before a tax credit certification is made.

Employment figures included in this report represent the total number of employees anticipated to be hired over the term of the incentive

agreement. Awards are released on an annual basis, and in the event that actual new employment substantially differs from the employment level indicated in the incentive agreement, the award is adjusted on a pro-rata basis to reflect actual performance. In no event can the total benefit received by a recipient exceed the total award amount indicated in its incentive agreement.

As the chart on the following pages shows, for active contracts since January 1, 2005, we have awarded \$493,205,260 in HBI credits, and of that amount, only \$360,071,957 in tax credits have been certified thus far. These tax credits correspond to an aggregate expected qualified investment for all recipients in the amount of about \$6.8 billion. The HBI tax credit is effective for encouraging recipients to make investments in the State, particularly if they project an Indiana income tax liability.

## SEF, INSPIRE AND TECH

### **Skills Enhancement Fund (IC 5-28-7)**

The Skills Enhancement Fund (“SEF”) is a job creation incentive that provides for reimbursement for a company’s costs to train its Hoosier employees. A SEF award is generally disbursed over a two year period. Most awards are limited to 50% of the company’s eligible training expenses. The award amounts in this report show the maximum amount that can be earned by the recipient for the project. Training figures in this report show the total number of employees anticipated to be trained over the term of the incentive agreement.

There were \$70,102,144 paid in SEF training funds. Given that SEF awards require matching dollar-for-dollar by the grantee, the SEF is an effective tool for developing a skilled labor pool, which helps retain and attract employers.

### **Indiana Specific Insurance Related Education and Technology Enhancement Certification For Hoosiers (IC 5-28-7)**

The Indiana Specific Insurance Related Education (“INSPIRE”) Training Program provided reimbursement for costs associated with obtaining insurance industry designations and certifications. The Technology Enhancement Certification for Hoosiers (“TECH”) Fund provided reimbursement for costs associated with earning recognized information technology certifications in areas including systems administration, systems engineering, and software development. There were no new awards under INSPIRE or TECH, which are not currently in use because SEF has been used to encompass their goals, though the chart below reflects that some INSPIRE and TECH agreements remain in the post-term reporting period.

**CAPITAL INVESTMENT,  
IP, and  
CReED**

**Capital Investment Tax Credit  
(IC 6-3.1-13.5)**

The Capital Investment Tax Credit is a job creation incentive that provides a 25% tax credit for investment in equipment, machinery, facilities, buildings, or foundations that are installed or used for a project having an estimated total cost of at least seventy-five million dollars (\$75,000,000) and in a county having a population of more than forty-three thousand (43,000) but less than forty-five thousand (45,000). Historically, this credit was used by only one company located in the City of Shelbyville. The program sunsets on December 31, 2016.

**Incentive Payment  
(IC 5-28-6-2)**

An Incentive Payment, made pursuant to the IEDC Act, IC 5-28, attracts recipients which employed large numbers of Hoosiers, using payment and compliance mechanisms

designed to guarantee long-term performance and growth. It is rarely used. During the last fiscal year, no new awards were made.

**Community Revitalization  
Enhancement District Tax Credit  
(IC 6-3.1-19)**

The purpose of the Community Revitalization Enhancement District Tax Credit (“CReED”) program is to enhance economic development and community revitalization in Indiana. The CReED program provides incentives for recipients making investments for redevelopment or rehabilitation of property located in a designated community revitalization enhancement district in Indiana. Recipients can qualify for a tax credit for up to 25% of their investment. During the last fiscal year, the IEDC made a single award of \$5.8 million, based on qualified investment of \$42 million.

**BDLF AND IDPGF**

**Business Development Loan Fund  
(IC 5-28-32)**

The Business Development Loan Fund (“BDLF”) is a revolving fund used to provide a borrower a direct loan for an economic development project. The proposed project must do any of the following: improve the technological capacity or productivity of the businesses; enhance the protection of Indiana’s environment; or permit the business to expand facilities, establish new facilities, or make site improvements or infrastructure improvements. While the program may be used to fulfill any of the foregoing purposes, it may also be used at times as a job creation incentive. No new awards have been made during the last fiscal year.

**Industrial Development Project  
Guaranty Fund  
(IC 5-28-30)**

The Industrial Development Project Guaranty Fund (“IDPGF”) is a non-lapsing, revolving fund used to provide a bank a guarantee for a loan secured by real property or personal property to or for the benefit of an industrial development project or agricultural operation that involves the processing of agricultural products. While the program may be used to fulfill any of the foregoing purposes, it may also be used at times as a job creation incentive. No new awards have been made during the last fiscal year.

**FUELS:**

**BIOFUELS**

and

**ALTERNATIVE FUELS**

**BioFuels: Biodiesel Production Tax Credit (IC 6-3.1-27-8), Blended Biodiesel Tax Credit (IC 6-3.1-27-9), and Ethanol Production Tax Credit (IC 6-3.1-28)**

The Biodiesel Production Tax Credit (\$1.00 per gallon), Blended Biodiesel Production Tax Credit (\$0.02 per gallon), and Ethanol Production Tax Credit (\$.0125 per gallon) programs provide a tax incentive to support the development of Indiana's biofuels industry. The statutory maximum under these programs was reached in 2006, and no new awards were made during the last fiscal year.

**Hoosier Alternative Fuel Vehicle Manufacturer Tax Credit (IC 6-3.1.31.9-22)**

The Hoosier Alternative Fuel Vehicle Manufacturer Tax Credit provides an incentive for investments in the manufacture or assembly of alternative fuel vehicles. There were no Hoosier Alternative Fuel Vehicle Manufacturer Tax Credits applied for and awarded during the reporting period.

**HEADQUARTERS  
RELOCATION  
NEW EMPLOYER,  
and  
LOCAL OPTION HIRING**

**Headquarters Relocation Tax Credit  
(IC 6-3.1-30)**

The Headquarters Relocation Tax Credit was established to incentivize the relocation of corporate headquarters to Indiana. Qualifying projects must involve the relocation of the principal offices of a company's principal executive officers. The credit amount is equal to 50% of a company's qualifying relocation costs. Effectively July 1, 2013, the Legislature loosened the requirements as to company size and redefined the meaning of headquarters. For the last fiscal year, there were no awards of headquarters relocation credits.

**New Employer Tax Credit  
(IC 6-3.1-33)**

In 2010, the New Employer Tax Credit program was established to encourage businesses to relocate, start new operations or expand existing operations in Indiana. To qualify for this credit, the business must employ at least 10 ten persons for 24 consecutive months. Since the program was established, no businesses have been approved to participate in this program.

**Local Option Hiring Incentive  
(IC 6-3.5-9)**

The Local Option Hiring Incentive was established to allow counties and cities to foster local job creation by providing incentives from certain tax remittances. This program was established in 2011 and to date; no qualified entities have submitted an annual report per IC 6-3.5-9-17.

## SECTION 2:

### OTHER ECONOMIC DEVELOPMENT PROGRAMS

For these programs, the report includes awards made during the last fiscal year and any previously-made awards which remained active during the last fiscal year. This section of the report also includes other programs which do not involve grants. Although these programs do not require direct job creation as do the programs in Section 1, the programs are designed to create economic benefit through indirect methods. This page and the following pages contain summary information by specific program, followed by the Incentive Recipient Spreadsheet containing specific information by recipient.

#### **Economic Development Fund (IC 5-28-8-8)**

The Economic Development Fund program (“EDF”) provides grants to communities or nonprofits undertaking various economic development initiatives. This fund may be used to support public works projects, technical assistance and studies, economic adjustment assistance, and other economic development programs. During the last fiscal year, there were \$1,268,000 in new grants awarded. There were awards made prior to the preceding fiscal year under which payments are continuing to be made as reflected in the chart below. These include awards to support development of life sciences, motorsports, defense industry and technology.

#### **Certified Technology Parks (IC 36-7-32)**

A Certified Technology Park (“CTP”) allows for business incubation to

encourage “high technology activity” in computers, biotechnology, engineering, vehicles, and product development. The CTP designation results in support for public facilities (i.e., infrastructure) in the CTP in the form of direct funding or bond issuance capabilities. During the last fiscal year, the IEDC approved 1 new CTP.

#### **Enterprise Zone Loan Interest Credit (IC 6-3.1-7)**

The Enterprise Zone Loan Interest Credit is intended to promote access to capital for businesses located in a designated enterprise zone (IC 5-28-15) by providing a tax credit to financial institutions making loans to zone businesses. The credit amount is equal to 5% of the interest the financial institution receives in conjunction with loans made to zone businesses. Financial institutions are not required to be located in an Enterprise Zone in order to receive the credit. The Indiana Code does not

require financial institutions to apply to the IEDC for approval nor does it require the entity making or receiving a qualified loan to report to the IEDC regarding new job creation or capital investment associated with the qualified loan. Rather, recipients are required to notify the IEDC on an annual basis regarding the total amount of credits claimed under this program. In calendar year 2012 (the most recent period available), there were \$1,191,956.34 in claimed tax credits.

**Coal Gasification Technology Investment Tax Credit (IC 6-3.1-29)**

The State of Indiana’s low utility rates make it an attractive location for many recipients. The coal gasification technology investment tax credit is for a newly-constructed integrated coal gasification power plant or a fluidized bed combustion technology, which converts coal into synthesis gas to either generate electricity or substitute

for natural gas. To be eligible for this credit, the facility must meet several statutory requirements, including being placed in service. Duke Energy Indiana, Inc. is the only potential recipient of this tax credit, for the facility in Edwardsport, Knox County.

**Indiana Life Sciences Fund (P.L. 234-2007)**

In 2007, the Legislature made an appropriation to Indiana University School of Medicine and Purdue University to support the recruitment and retention of world class scientists specializing in the life sciences. During the last fiscal year, the grant to Indiana University was extended, as reflected in the chart below; the Purdue University grant was closed out prior to the preceding fiscal year.

**Industrial Development Grant Fund (IC 5-28-25)**

The Industrial Development Grant Fund (“IDGF”) provides assistance to communities making infrastructure investments in support of economic development opportunities. Eligible infrastructure includes airport facilities, sanitary or storm sewers, water lines, streets, rail spurs, information and high technology infrastructure, or other real or personal property. During the last fiscal year, there were \$2,309,000 in new grants awarded.

**Industrial Development Loan Fund (IC 5-28-9)**

The Industrial Development Loan Fund (“IDLF”) provides loans to small business investment recipients as well as to certain qualified entities for approved industrial development programs. An industrial development program is defined as a program designed to aid the growth of industry in Indiana and includes support for

various types of infrastructure. During the last fiscal year, there were no new loan funds awarded from this program.

**Industrial Recovery Tax Credit  
(IC 6-3.1-11)**

The Industrial Recovery Tax Credit (known as “DINO” for “dinosaur”) provides an incentives for recipients to make significant investments in rehabilitation or remodeling costs for in existing facilities with high-vacancy rates. Effective July 1, 2013, the Legislature loosened the application requirements. The nonrefundable credit is based on a percentage of the investment. During the last fiscal year, no new awards were made.

**Local Economic Development  
Organization Fund  
(IC 5-28-11)**

The Local Economic Development Organization Fund (“LEDO”) provides grants to economic development

commissions, regional planning commissions and nonprofit organizations undertaking strategic planning and capacity building initiatives. This program is designed to provide resource support to local and regional groups conducting activities such as asset inventory and analysis, target industry studies, and development of regional marketing plans. The maximum grant amount is \$50,000 per year for a single county initiative and \$75,000 per year for a multi county initiative. During the last fiscal year, no new awards were made.

**Small Business Development Fund  
(IC 5-28-18-8(9))**

The Small Business Development Fund, formerly known as the Microenterprise Partnership Program, provides small loans to nontraditional entrepreneurs. The loan fund is administered by the Indiana Housing and Community Development Authority, effective June 30, 2012. There were no new awards

made by the IEDC during the reporting period.

**Small Business Incubator Program  
(IC 5-28-21-21)**

The Small Business Incubator Program is a revolving fund to provide grants, loans and guarantees to incubators for business development in economically disadvantaged areas. During the last fiscal year, there were no new grants, loans and guarantees awarded.

**Twenty-First Century Research and  
Technology Fund (21F), Small Business  
Innovation Research (SBIR) and Small  
Business Technology Transfer (STTR)  
Match Programs  
(IC 5-28-16)**

The Twenty-First Century Fund (“21 Fund”) provides grants (including matching SBIR/STTR grants) or loans to recipients engaged in the commercialization of innovative new technologies. This program does not

have a statutory job creation requirement. Per IC 5-28-16-6, the full report on 21 Fund activities for the preceding state fiscal year will be made to the legislative council by September 1, 2013.

**South Central Indiana Regional Partnership Fund  
(IC 4-33-12-6(c)(1)(G))**

The South Central Indiana Regional Partnership Fund (“SCIRP”) provides that the IEDC receives a portion of the admissions and wagering taxes generated at the French Lick casino. These funds are to be used for the development and implementation of an economic development strategy for the region comprised of Orange County and its five contiguous counties. In the past, the IEDC deployed these funds for specific projects such as airport enhancement and Westgate’s economic center. Recently, Radius Indiana, Inc., the regional economic development organization, has been employed to

apply the SCIRP funds strategically throughout the region. During the last fiscal year, there were \$1,824,995 in new grants awarded.

**Technology Development Grant  
(IC 5-28-10)**

The Technology Development Grant Fund (“TDGF”) provides assistance to communities in which a Certified Technology Park has been established. TDGF awards may be used to offset capital or operating expenditures and must be used within the boundaries and in support of a community’s Certified Technology Park. During the last fiscal year, there were no new grants, loans and guarantees awarded.

**Trade Show Assistance Program  
(IC 5-28-14)**

The Trade Show Assistance Program supports Indiana based businesses that market their products and services to an international audience

by providing financial support for their participation in international trade shows or local events. The maximum amount of funding is \$5,000, or 100% of trade show exhibit space rental fees, whichever is less. During the last fiscal year, there were no new grants, loans and guarantees awarded.

**Venture Capital Investment Tax Credit  
(IC 6-3.1-24)**

The Venture Capital Investment Tax Credit supports innovative new business in Indiana in certain types of industries, such as life sciences, technology, and research and product development. After a proposed business is deemed to be a Qualified Indiana Business (“QIB”), the venture capital investors are eligible for a nonrefundable tax credit equivalent to up to 20% of their investment. During calendar year 2012, there were 52 newly certified QIBs with planned investment exceeding 67 million.

## GLOSSARY:

This glossary explains the headings used in the charts in the foregoing pages.

### Project ID

Each project is assigned an identification number, as shown in this column. Each project may have more than one type of incentive. Each incentive has a Status, defined below.

### Contract Year

This column shows the year that the incentive contract was signed. Incentive contracts are long-term, up to 12 years, covering an Active Term and a Post-Term Reporting period, defined below.

### Recipient, City and County

These terms have their common meanings.

### Fund

This abbreviation designates the source of funding for the tax credit, grant or loan, as described in the

program listing in the foregoing pages. For more detail, please refer to the program descriptions at the beginning of this report.

### Base Jobs

Base Jobs is the number of employees that a company already has when the incentive contract is beginning. When the Base Jobs is "zero," it indicates that the type of project is an "attraction" project, which is one in which the IEDC has attracted a new company to the State of Indiana. When the Base Jobs is a number other than zero, it indicates the project was for an "expansion," which is when the IEDC has retained a portion of an Indiana business that could have been relocated to another State. When there is no expected increase from the Base Jobs, the project is considered to be a "retention" project. These are rare, and is one in which the State has offered incentives for a company promising to maintain significant employment and not to exit the State for a long period of time.

### Contract Amount

This column shows the amount awarded for each active incentive which is in an Active Term or Post-Reporting Term Status (see Contract Status definition below). The Total Amount Awarded is the maximum amount that can be earned under the contract, which typically lasts up to 12 years.

### Expected New Jobs by Contract End

This figure represents the job projection that the company promised to meet over several years. Compare to Expected New Job for the Calendar year, below, which specifies how the company "ramps up" their jobs over the course of several years.

### Paid/Certified to Date

The IEDC may approve a tax credit through a certification process evaluating the recipient's performance under its contract each year. Contracts are long-term, so the Paid/Certified amounts do not include future eligibility for grant funds or certifications. The recipient may opt

use the certification to reduce its tax liability. In contrast, a grant results in a payment to a company, typically reimbursement for half of the costs associated with training Hoosiers under the SEF program. This column shows amounts paid or tax credits certified as of June 30, 2013. This column **does not** include adjustments made after the payment or certification issued, e.g., for recaptured amounts. For “Adjustments,” please see the Transparency Portal.

#### **Expected New Jobs by Calendar Year**

This figure represents the number of new jobs the recipient intended to hire by the end of a certain year. Recipients “ramp up” their jobs over the course of several years.

#### **Expected to be Trained**

This figure shows the number of employees that the company trained, using matching grant dollars to pay for the training to improve Hoosiers workforce skills.

#### **Actual Qualified Investment Amount**

This amount is how much the recipient has expended on capital improvements and equipment at its Indiana location. It only applies to the HBI program.

#### **Contract Status**

Incentive contracts are generally long-term, typically up to 12 years, covering an Active Term and a Post-Term Reporting period. **Active Term** means that the Company is currently eligible to earn and to be approved for incentives under a contract. **Post-Term Reporting** means that the Company is no longer eligible to be paid or certified additional funds or credits but is still required by the contract to meet job, payroll, and operational goals. These recipients are still required to report information annually. **Contract Ended** means that a company had been under contract for incentives, but the contract is no longer in Active or Post-Term Reporting periods. Without a contract in place, the IEDC cannot formally monitor the company’s performance. Contracts

end for a number of different reasons. Sometimes the company may have decided not to take incentives but performed anyway. Sometimes, the business has shut down or relocated, or the business has been acquired. Also, some contracts are ended when the company satisfied the terms.

**Compliance Status.** The IEDC’s most commonly used incentives – EDGE, EDGE-R, SEF, and HBI – have contracts which require recipients to annually report their performance. The IEDC annually monitors performance for recipients with contracts in the Active Term or Post-Term Reporting stages. Once a contract ends, the IEDC does not formally monitor the company. A company is noncompliant only when the IEDC has made a determination that a company has not met the terms of its contract. Because incentives are aligned with the company’s performance, noncompliance is uncommon. When the IEDC is able to come to an agreement with a company about satisfying the terms of its contract, the matter is considered

to be in compliance. Noncompliance usually occurs only when a company is unable to repay funds that the IEDC has determined are owed. The IEDC may decide to write off uncollectible amounts, pursue collection of grants funds or refer to the Department of Revenue for tax assessment proceedings.
