

Economic Incentives and Compliance Report

INDIANA ECONOMIC DEVELOPMENT CORPORATION

For the Reporting Period January 1, 2005 – December 31, 2014

A MESSAGE FROM:

VICTOR P. SMITH
SECRETARY OF COMMERCE

ERIC R. DODEN
PRESIDENT

Dear Fellow Hoosiers,

A look back at 2014 yields Indiana stories of growth, innovation and opportunity. As Indiana’s lead economic development operation, our entire team at the Indiana Economic Development Corporation (IEDC) interacts daily with the true drivers of a growing economy—the Hoosiers who take risks, create jobs and pursue their dreams. Equipped with the best asset any company could seek—a team of skilled, hardworking and dedicated Hoosiers—in 2014 businesses made big plans in Indiana, leading the Hoosier State

to a record year in economic development.

When our team talks with leaders of growing businesses, we hear exactly what they’re looking for in a location, and we’ve built our business climate around what we’ve learned. Job creators need a state that’s predictable. Indiana offers that through our consistently balanced budgets, which has helped us earn a triple-A bond rating from all three credit agencies. While businesses in other states face the fear of unexpected tax hikes, you know what you’re getting in the Hoosier State. Indiana is cutting taxes and red tape, with Governor Mike Pence signing into law a reduction schedule for our corporate income tax rate early in the year.

Companies are noticing what together we've built here. In 2014, the IEDC received job commitments from 285 companies, making plans to invest \$4.38 billion in their Indiana operations and create 25,317 new jobs in the coming years. That's more companies than in any other year on record.

Many of those companies tell us they are choosing Indiana against other higher-taxed states because their dollar goes further here. California-based tech firm Systems in Motion announced in May that it's bringing 400 new jobs to Kokomo and Carmel, relying on Indiana for its "top-notch technical talent," according to a company executive. Lower taxes, combined with an all-around more affordable cost of doing business, are acting

as a magnet for companies looking for an advantage.

And with a world of options, companies from spots all around the globe are choosing Indiana, too. Governor Pence led four international jobs and economic development missions this year, meeting business and government leaders in Germany, Canada, the United Kingdom and Israel.

And while we'll always welcome out-of-state entrepreneurs to discover the competitive advantage they earn in Indiana, the foundation of our Hoosier success story remains our homegrown-Hoosier enterprises. That includes companies like Hat World, which launched with one store in Lafayette in 2004 and today operates a central Indiana headquarters that supports 1,000

retail stores nationwide. In January Hat World announced plans to create 758 new Hoosier jobs, continuing success that started right here.

Along with international friends and our homegrown-Hoosier success stories, this year the aerospace sector also took flight in Indiana. In March GE Aviation, an iconic American company, announced that it was locating a 225,000 square-foot jet engine facility in Lafayette, bringing 200 new Hoosier jobs and the latest in aerospace technology. GE later announced it was partnering with the University of Notre Dame to locate a turbomachinery research facility in South Bend. With the partnership, Indiana gains more engineers, scientists and technicians trained in applied

research, while GE helps advance aerospace technology.

All of these companies helped Indiana outpace the nation in job growth in 2014. From November 2013 to November 2014, Indiana gained 50,600 private sector jobs. The trend continues even when you look long-term, with Indiana adding 264,800 private sector jobs since July 2009, the ninth largest increase in the nation.

In this report we've detailed the IEDC's agreements with companies in 2014, along with active agreements from past years. We also cover the grants, loans and tax credit programs administered by the IEDC. These companies are the true drivers of our Indiana economy, helping write the story of a state where jobs grow our communities and provide great

opportunities for all Hoosiers. The year of 2014 may be in the record books, but our team remains committed to staying in touch with these companies, checking in on their progress and seeing how we can help them reach their goals here in Indiana.

From our perspective, every new deal is the beginning of a long-term partnership when we bring companies to Indiana. And we show them our Hoosier hospitality. We are a national standout in servicing our accounts, keeping our promises for the grants and tax credits that help our companies grow and prosper more quickly, turning around payments and tax credit letters at the speed of business -- all so our companies can count on us in their planning.

We look ahead to 2015, the 10th anniversary of Indiana's chief economic development team working for you. Let us know if you have any questions, ideas or thoughts, since only together can we continue to make Indiana a state that works.

Sincerely,

Victor P. Smith
Secretary of Commerce

Eric R. Doden
President

INTRODUCTION

As in past years, the Indiana Economic Development Corporation (IEDC) continues to provide an expanded Economic Incentives and Compliance Report as part of our efforts to promote transparency of our operations. Transparency provides an opportunity for greater public participation and allows for continued improvement.

This report covers the grants, loans, and tax credit programs administered by the IEDC. This report provides information required by Indiana Code § 5-28-28. This report canvasses active project information as far back as 2005, which was the inception of

the IEDC as the successor to the Indiana Department of Commerce.

This report includes easy-to-read descriptions of the programs included within this report, pertinent details about them, followed by the supporting data and a glossary that explains the meaning of each of the terms used frequently throughout the report.

The report will be posted on the IEDC's transparency website, <https://transparency.iedc.in.gov>, in the "Additional Public Information" section. This posting is consistent with Indiana Code 5-28-6-2(b)(8), 5-14-6-4. In addition, the portal contains real-time data, so please refer to it for updates to the information contained within this report.

The IEDC invites suggestions and feedback on how we can continue to improve. Please visit us at www.iedc.in.gov.

Section 4: Incentive Recipient Data

Spreadsheet.....21-104

Section 5: Glossary of Terms.....105

SECTION 1:

JOB CREATION INCENTIVES

This section reports on job creation incentive agreements executed during the time period from **January 1, 2005 to December 31, 2014**, which remain active or were ended during calendar year 2014. This page contains aggregate information per statutory requirements. Then, the following pages contain summary program information followed by the Incentive Recipient Spreadsheet.

Actual Jobs Created and Number of Expected Jobs Through the Reporting Year

For contractual commitments since January 1, 2005, that also had an annual reporting requirement at least through December 31, 2013, actual jobs created totaled 85,292 and the number of expected jobs were 95,522. For a more detailed report, please visit

the IEDC's transparency website, <https://transparency.iedc.in.gov>, in the "Additional Public Information" section, Indiana Incentive Compliance Report, under the link labeled "Indiana Jobs Data Review – 2013.pdf". As of the published date of this Economic Incentives and Compliance Report (January 31, 2015), companies are in the process of submitting their employment and investment data for actual jobs created during calendar year 2014.

Recaptures

A recapture may occur when the recipient is not meeting contractual obligations and repays the Paid Amounts and/or forgoes the Certified Amounts (see Glossary), in whole or in part. In that instance, the Recapture column (see Glossary) will be marked "Y." Per IC 5-28-28-6(1)(D), this report must include the total amount of the recaptured incentives for the reporting year and the total number of recipients. During calendar year 2014,

the IEDC received \$326,754 in cash and \$3,345,067 in forgone certified tax credits, for a total of \$3,671,821 recaptures from 13 recipients. (Most of these recaptures are included in the data sheet; in addition to the amounts in the data sheet, during 2014, we also recaptured amounts arising from (1) contracts which ended prior to 2014, and (2) contracts entered into prior to 2005.) Once repayment is made or a modification is reached, the recipient is compliant with its contract as denoted by the "Y" in the Compliance Status (see Glossary) column. For modifications, the agreement may or may not remain in Active status, depending upon the terms of the modification. The Recapture column does not include amounts written off as uncollectible or amounts which may be pending enforcement. When an account is not collectible, it is marked "N" in the Compliance column.

EDGE

Economic Development For A Growing Economy Tax Credit (IC 6-3.1-13)

EDGE for Job Creation

The Economic Development for a Growing Economy tax credit program is Indiana's primary job creation incentive. The EDGE Program provides a tax credit to recipients creating new jobs, based on the number of new jobs and the wages associated with those jobs.

The amount of the certified tax credit is based on the recipient's performance for the prior calendar year. The certification may be reduced pro-rata based if the Expected New Jobs by the Most Recent Calendar Year is not fully reached. In the chart below, the Certified to Date amount is the portion of the total Contract Amount which has been earned by the recipient to date. The tax credit

certification is made annually for a period of up to ten years, after which unearned amounts are lost.

As the chart on the following pages shows, for active contracts since January 1, 2005, we have awarded \$1,084,359,271 in EDGE tax credits, and of that amount, only \$213,192,675 in tax credits have been certified as eligible to be claimed thus far.

During calendar year 2014, the IEDC made awards of EDGE totaling \$223,717,843. During calendar year 2014, \$37,345,849 in EDGE credits were claimed and allowed on Indiana tax returns. (This figure was reported by the Indiana Department of Revenue pursuant to IC 5-28-28-6(1)(E).) By dollar value, the EDGE tax credit is the most-used job creation incentive and a highly effective tool available to encourage expansion and new ventures.

EDGE for Job Retention

The EDGE-R job retention tax credit program is an incentive that is rarely offered. The purpose of EDGE-R is to encourage a company to remain in Indiana and not relocate, thereby keeping existing jobs in the State of Indiana. There are limited funds available for these. The company is required to remain in Indiana to keep the incentives. Sometimes, a retention project is mixed with a job creation project, so that a company must retain and grow. These are reflected in the Employment Numbers in the chart. As the chart on the following pages shows, for active contracts since January 1, 2005, we have awarded \$12,191,132 in EDGE-R tax credits, and of that amount, only \$2,315,539 in tax credits have been certified as eligible to be claimed thus far.

HBI

Hoosier Business Investment Tax Credit (IC 6-3.1-26)

The Hoosier Business Investment Tax Credit (“HBI”) program requires an increase in employment or in payroll and is generally used to incentivize job creation. The overall purpose of the program is to encourage recipients to make significant new capital investment in Indiana. Investments must be approved in advance by the IEDC. The credit amount can be up to a maximum of 10% of the company’s eligible capital investment. Earned tax credits may be carried forward for a period of up to nine years.

As the chart on the following pages shows, for active contracts since January 1, 2005, we have awarded \$457,770,556 in HBI credits, and of that amount, only \$346,019,647 in tax credits have been certified as eligible to be claimed thus far.

During calendar year 2014, \$7,345,478 in HBI credits have been claimed and allowed on Indiana tax returns. (This figure was reported by the Indiana Department of Revenue pursuant to IC 5-28-28-6(1)(E).

These tax credits correspond to an aggregate expected qualified investment for all recipients in the amount of about \$7.89 billion of which \$5.28 billion has already occurred. The HBI tax credit is effective for encouraging recipients to make investments in the State, particularly if they project an Indiana income tax liability.

SEF, INSPIRE AND TECH

Skills Enhancement Fund

(IC 5-28-7)

The Skills Enhancement Fund (“SEF”) is frequently used as a job creation tool. This grant provides reimbursement, usually at a dollar-to-dollar match, for a company’s eligible costs to train its Hoosier employees. A SEF award is generally disbursed over a two year period. The award amounts in this report show the maximum amount that can be earned by the recipient for the project. Training figures in this report show the total number of employees anticipated to be trained over the term of the incentive agreement.

Under a targeted initiative known as Workforce 2.1, SEF funding was used to support training programs directed towards workforce deficiencies, particularly in the manufacturing and logistics fields.

As the chart on the following pages shows, for active contracts since January 1, 2005, we have awarded \$112,925,791 in SEF training funds, of which \$57,394,969 has been paid. Given that SEF awards require matching dollar-for-dollar by the grantee, the SEF is an effective tool for developing a skilled labor pool, which helps retain and attract employers.

Indiana Specific Insurance Related Education and Technology Enhancement Certification For Hoosiers (IC 5-28-7)

The Indiana Specific Insurance Related Education (“INSPIRE”) Training Program provided reimbursement for costs associated with obtaining insurance industry designations. The Technology Enhancement Certification for Hoosiers (“TECH”) Fund provided reimbursement for costs associated with earning recognized information technology certifications. There were no new awards under INSPIRE or TECH, which are not currently in use because SEF has been used to encompass their goals, though the chart below reflects that some INSPIRE agreements remain in the post-term reporting period.

CAPITAL INVESTMENT,

IP, and

CRED

Capital Investment Tax Credit (IC 6-3.1-13.5)

The Capital Investment Tax Credit provides a 25% tax credit for investment in equipment, machinery, facilities, buildings, or foundations for a project having a total cost of at least seventy-five million dollars located in a county with a population of more than forty-three thousand (43,000) but less than forty-five thousand (45,000). This credit was used by only one company located in the City of Shelbyville. The program sunsets on December 31, 2016.

Incentive Payment (IC 5-28-6-2)

An Incentive Payment, made pursuant to the IEDC Act, IC 5-28, attracts recipients in unique industries, using payment and compliance mechanisms designed to guarantee long-term performance and growth. This program is used rarely, with no new awards since 2008.

Community Revitalization Enhancement District Tax Credit (IC 6-3.1-19)

The purpose of the Community Revitalization Enhancement District Tax Credit (“CRED”) program is to enhance economic development and community revitalization in Indiana. The CRED program provides incentives for recipients making investments for redevelopment or rehabilitation of property located in a designated community revitalization enhancement district in Indiana. Recipients can qualify for a tax credit for up to 25% of their investment. During the 2014 year, the IEDC entered into two contracts for awards totaling \$13.8 million, based on qualified investment of \$55.3 million.

BDLF AND IDPGF,

BIOFUELS and

ALTERNATIVE FUELS

Business Development Loan Fund (IC 5-28-32)

The Business Development Loan Fund (“BDLF”) is a revolving fund used to provide a borrower a direct loan for an economic development project. No new awards have been made during the last calendar year.

Industrial Development Project Guaranty Fund (IC 5-28-30)

The Industrial Development Project Guaranty Fund (“IDPGF”) is a non-lapsing, revolving fund used to provide a bank a guarantee for a loan secured by real property or personal property to or for the benefit of an industrial development project or agricultural

operation that involves the processing of agricultural products. No new awards have been made during the last calendar year.

BioFuels: Biodiesel Production Tax Credit (IC 6-3.1-27-8), Blended Biodiesel Tax Credit (IC 6-3.1-27-9), and Ethanol Production Tax Credit (IC 6-3.1-28)

The Biodiesel Production Tax Credit, Blended Biodiesel Production Tax Credit, and Ethanol Production Tax Credit programs provided a tax incentive to support the development of Indiana’s biofuels industry. The statutory maximum under these programs was reached in 2006, and no new awards were made during the 2014 calendar year. These programs were repealed effective January 1, 2015.

Hoosier Alternative Fuel Vehicle Manufacturer Tax Credit (IC 6-3.1.31.9-22)

The Hoosier Alternative Fuel Vehicle Manufacturer Tax Credit provides an incentive for investments in the manufacture or assembly of alternative fuel vehicles. There were no Hoosier Alternative Fuel Vehicle Manufacturer Tax Credits applied for and awarded during the reporting period. This program will sunset on December 31, 2016.

HEADQUARTERS

RELOCATION

NEW EMPLOYER,

and

LOCAL OPTION HIRING

Headquarters Relocation Tax Credit (IC 6-3.1-30)

The Headquarters Relocation Tax Credit was established to incentivize the relocation of corporate headquarters to Indiana. Qualifying projects must involve the relocation of the principal offices of a company's principal executive officers. The credit amount is equal to 50% of a company's qualifying relocation costs. Effectively July 1, 2014, the Legislature modified the requirements as to company size and redefined the meaning of headquarters. During the last calendar year, the IEDC entered

into one agreement for headquarters relocation credits.

New Employer Tax Credit (IC 6-3.1-33)

In 2010, the New Employer Tax Credit program was established to encourage businesses to relocate, start new operations or expand existing operations in Indiana. To qualify for this credit, the business must employ at least 10 ten persons for 24 consecutive months. Since the program was established, no businesses have been approved to participate in this program. This program was repealed effective January 1, 2015.

Local Option Hiring Incentive (IC 6-3.5-9)

The Local Option Hiring Incentive was established to allow counties and cities to foster local job creation by providing incentives from certain tax remittances. This program was established in 2011 and to date; no qualified entities have submitted an annual report per IC 6-3.5-9-17.

SECTION 2:

IEDC COLLABORATION WITH LOCAL ECONOMIC DEVELOPMENT ORGANIZATIONS

Pursuant to IC 5-28-11-10, the IEDC submits this report on its collaboration with Local Economic Development Organizations.

Indiana Economic Development Association

The Indiana Economic Development Association (IEDA) is a state-wide association of individuals and organizations engaged in promoting economic development in Indiana. The association is the premier membership organization for Indiana's local and regional economic development entities. The IEDC is an active participant in the IEDA. The IEDC presents

economic development updates at each of the association's quarterly conferences. The IEDC holds fifteen memberships in the IEDA. Also, an IEDC Vice President serves on the IEDA board of directors in an ex-officio capacity and, in that role, assists in providing direction for the association, its programs and activities.

Partnership Outreach

The IEDC hosts annual sales trips with the participation of local economic development organizations, regional economic development organizations, and utility partners. Trip objectives include meetings with site consultants and companies to attract new business to the state of Indiana. In 2014, sales trips include travel to Los Angeles, Chicago, New York and Toronto. In addition, local and regional economic development organizations serve as co-hosts for special events with

the IEDC including the Big Ten Football Championship and Carburetion Day.

Training Sessions

In 2014, the IEDC provided six training sessions for local economic development organizations in cooperation with regional economic development organizations. These workshops included an overview of the business development process, system training for the site and building database (Zoom Prospector) and the Project Information Management System (PIMS) research tools and resources and regulatory affair items. The Project Information Management System (PIMS) is an online resource for local and regional economic development organizations to track IEDC project status, compile community metric data, and upload project information. Indiana's site and building online

database, which is located at statein.zoomprospector.com, was ranked first in the nation in Sigala Inc.'s State Ranking of Best Economic Development Site Selection Website Services study.

The study, which was compiled by California-based Sigala Inc., compared and ranked all 50 states' online site selection analysis and assistance websites based on 300 variables related to four major functional site location categories: lead generation, community search, property search and location analysis. The study ranked Indiana's site selection website first in the nation for overall excellence, with the website also receiving the top ranking in the Midwest and top ranking among medium size population states. Within the four major categories, Indiana ranked first in lead generation, which includes the website's initiatives to drive traffic back to the website,

and ranked in the top three for location analysis, which includes the website's data, data categories and ability for visitors to customize data analysis. The state also received the top ranking for its community search function, a function which allows companies to effectively select the correct location to meet its expansion or relocation needs.

With functionality that integrates available site and building properties, community statistics, business information, interactive heat maps and Indiana certified shovel ready site data in a one-stop location, the IEDC launched statein.zoomprospector.com in 2009 to streamline the Indiana location search process for businesses looking to expand or locate to the Hoosier State. Built by GIS Planning, the website was also recently offered to counties across Indiana to utilize the website's

resources to promote their local communities.

In addition to being accessible directly by visiting statein.zoomprospector.com, the site selection website can also be reached through IEDC's main website, iedc.in.gov, a site that serves as the primary digital source for showcasing Indiana's pro-business climate and strong workforce to businesses around the world.

Site Searches

Totally up 2014, the IEDC has responded to 140 site and building inquiries from companies and or consultants and more than 31 Request for information (RFIs). The IEDC responds to these inquires with site, building and community data submitted by local and regional economic development organizations.

Announcements

The media relations department at the IEDC works closely with local and regional economic development organizations throughout the state on a daily basis. In the early stages of planning, writing and issuing a press release, the media relations staff is in frequent contact with members of the local economic development organizations. The local economic development partners are an integral part of the drafting process of an effective press release as they advise on the language of the local incentives, provide history and context of the project and secure quotes from local elected officials. For press events, the media relations department again routinely enlists the help of local and regional organizations. In this capacity, they provide logistical support such as securing podiums and sound systems, along with tents

for outdoor announcements. They also work with local government officials and representatives to coordinate schedules and arrival times.

International

The IEDC international department has coordinated a number of economic development trips and initiatives in partnership with local economic development officials. In April 2014, Governor Mike Pence spearheaded an economic development trip to Germany which resulted in 3 jobs announcements by existing Indiana investor Jaeger and new Indiana investors DOT GmbH and Norres Schlauchtechnik. In July 2014, Governor Pence was joined by 5 Indiana aerospace and defense companies, Ivy Tech, the City of Lafayette, INDOT, and the Indiana Aerospace & Defense Council (IADC), to display at the Farnborough Air Show. Along with

the Paris Air Show, Farnborough is the world's premier aviation and defense industry trade show. Also in July, Secretary of Commerce Victor Smith met with potential investors in Switzerland and France. In October, the IEDC participated in US Commercial Service conferences in Lyon and Nantes (France) which targeted French companies of various industries looking to invest in the US.

The IEDC also participated in the "USA re-shoring: Partners in Growth Summit" held in Varese, Italy, on June 5th. This event was organized jointly by the Italian Trade Commission of Chicago and Select USA. During the same trip to Italy similar outreach events and meetings were held in Milan and Turin. Indiana met with over twenty companies with plans to expand their activities to the US and several new investment projects in Indiana are underway as a direct result.

Visits to Japan, Indiana's largest international investor, were taken in March and June to select a new Director of IEDC Japan, Mr. Toshikazu "Tony" Suzuki, and to introduce him to our Japanese clients. Five companies were visited in March and Subaru, Toyota, and Honda were visited in June. The IEDC also assisted the agriculture trade mission headed by Lt. Governor Sue Ellspermann, which visited Tokyo and Indiana's Sister State, Tochigi Prefecture in June. Finally, Secretary of Commerce Victor Smith joined South Central Indiana's regional group for an additional visit to Japan in October, which consisted of more than twenty business development meetings with companies and two receptions in Tokyo and Nagoya. Trips to China were taken in March and June with an additional visit in October to meet with companies and to further develop IEDC's China office strategy. The October

visit included Promotional Business Presentational Seminars in Indiana's Sister State, Hangzhou and Southern China city of Guangzhou. In December, Governor Pence and Victor Smith participated in a 9-day economic development trip to Israel, his fifth international trip as Governor. Domestically, the international department hosted the 2nd annual Chicago International Trade Commissioner's Association luncheon in partnership with Develop Indy. Trade Commissioners and other international economic development officials from almost 30 countries and regions joined for a presentation on the benefits of doing business in Indiana. Additionally, IEDC has met with dozens of international site selection consultants in markets all over the United States.

Local Economic Development

Organization Fund

(IC 5-28-11)

The Local Economic Development Organization Fund ("LEDO") provides grants to economic development commissions, regional planning commissions and nonprofit organizations undertaking strategic planning and capacity building initiatives. This program is designed to provide resource support to local and regional groups conducting activities such as asset inventory and analysis, target industry studies, and development of regional marketing plans. The maximum grant amount is \$50,000 per year for a single county initiative and \$75,000 per year for a multi county initiative. During the last calendar year, there were no new awards.

SECTION 3:

OTHER ECONOMIC DEVELOPMENT PROGRAMS

For these programs, the report includes awards made during the last calendar year and any previously-made awards which remained active during the last calendar year. This section of the report also includes other programs which do not involve grants. Although these programs do not require direct job creation as do the programs in Section 1, the programs are designed to create economic benefit through indirect methods. This page and the following pages contain summary information by specific program, followed by the Incentive Recipient Spreadsheet containing specific information by recipient.

Economic Development Fund (IC 5-28-8-8)

The Economic Development Fund program ("EDF") provides grants to communities or nonprofits undertaking various economic development initiatives. This fund may be used to support public works projects, technical assistance and studies, economic adjustment assistance, and other economic development programs. During the last calendar year, there were \$5,575,000 in new grants awarded. There were awards made prior to the preceding fiscal year under which payments are continuing to be made as reflected in the chart below. These include awards to support development of life sciences, motorsports, defense industry and technology.

Certified Technology Parks (IC 36-7-32)

A Certified Technology Park ("CTP") allows for business incubation to

encourage "high technology activity" in computers, biotechnology, engineering, vehicles, and product development. The CTP designation results in support for public facilities (i.e., infrastructure) in the CTP in the form of direct funding or bond issuance capabilities. During the last calendar year, there were no new designations.

Enterprise Zone Loan Interest Credit (IC 6-3.1-7)

The Enterprise Zone Loan Interest Credit is intended to promote access to capital for businesses located in a designated enterprise zone (IC 5-28-15) by providing a tax credit to financial institutions making loans to zone businesses. The credit amount is equal to 5% of the interest the financial institution receives in conjunction with loans made to zone businesses. Financial institutions are not required to be located in an Enterprise Zone in

order to receive the credit. The Indiana Code does not require financial institutions to apply to the IEDC for approval nor does it require the entity making or receiving a qualified loan to report to the IEDC regarding new job creation or capital investment associated with the qualified loan. Rather, recipients are required to notify the IEDC on an annual basis regarding the total amount of credits claimed under this program. In calendar year 2013 (the most recent period available), there were \$1,150,104 in claimed tax credits.

Coal Gasification Technology Investment Tax Credit (IC 6-3.1-29)

The State of Indiana's low utility rates make it an attractive location for many recipients. The coal gasification technology investment tax credit is for a newly-constructed integrated coal gasification power

plant or a fluidized bed combustion technology, which converts coal into synthesis gas to either generate electricity or substitute for natural gas. To be eligible for this credit, the facility must meet several statutory requirements, including being placed in service. Duke Energy Indiana, Inc. is the only recipient of this tax credit, for the facility in Edwardsport, Knox County.

Indiana Life Sciences Fund (P.L. 234-2007)

In 2007, the Legislature made an appropriation to Indiana University School of Medicine and Purdue University to support the recruitment and retention of world class scientists specializing in the life sciences. During the last calendar year, the remaining active grant was closed out, and no new grants will be made under this program.

Indiana Promotion Fund (IC 5-28-8-8)

The Indiana Promotion Fund program ("IPR") provides funds for a variety of projects designed to enhance economic development in the State of Indiana, and this fund is used broadly to accomplish these purposes. During the reporting period, the fund was used to (1) guarantee air service via a new nonstop airline route between Indianapolis and San Francisco, to enhance access to the Information technology industry on the West Coast and provide a gateway to Asian locations; (2) provide a match for a \$1,000,000 federal grant to the Battery Innovation Center for research, development and marketing of specialized high-tech batteries for numerous end-users; (3) to support the Indiana Supplier Insight database, an online source which encourages use of Indiana businesses for manufacturing and other needs;

and (4) to support the goals of the NCCO, a non-profit organization that aims to promote the defense industry in the State of Indiana.

Industrial Development Grant Fund (IC 5-28-25)

The Industrial Development Grant Fund (“IDGF”) provides assistance to communities making infrastructure investments in support of economic development opportunities. Eligible infrastructure includes airport facilities, sanitary or storm sewers, water lines, streets, rail spurs, information and high technology infrastructure, or other real or personal property. During the 2014 calendar year, there were \$6,636,000 in new grants awarded.

Industrial Development Loan Fund (IC 5-28-9)

The Industrial Development Loan Fund (“IDLF”) provides loans to small business investment recipients as well as to certain qualified

entities for approved industrial development programs. An industrial development program is defined as a program designed to aid the growth of industry in Indiana and includes support for various types of infrastructure. During the last calendar year, there were no new loan funds awarded from this program.

Industrial Recovery Tax Credit (IC 6-3.1-11)

The Industrial Recovery Tax Credit (known as “DINO” for “dinosaur”) provides an incentive for recipients to make significant investments in rehabilitation or remodeling costs for in existing facilities with high-vacancy rates. Effective for the taxable year beginning January 1, 2015, the buildings or complex of buildings that are part of the vacant industrial facility must have at least 100,000 square feet of floor space. The nonrefundable credit is based on a percentage of the

investment. During the 2014 calendar year, one new award was totaling \$5,235,763 based on expected qualified investment made totaling \$20,943,050.

Twenty-First Century Research and Technology Fund (21F) (IC 5-28-16)

The Twenty-First Century Fund (“21 Fund”) provides grants (including matching Small Business Innovation Research and Small Business Technology Transfer grants, as available) or loans to recipients engaged in the commercialization of innovative new technologies. This program does not have a statutory job creation requirement. The chart below reflects a life sciences research grant made from the 21 Fund. In addition, per IC 5-28-16-6, the full report on the remaining 21 Fund activities for the preceding state fiscal year was made to the legislative council by September 1, 2014, and the new

report will also be made by September 1, 2015 for the 2014-2015 fiscal year. To see the report, please visit the IEDC's transparency website, which is located at <https://transparency.iedc.in.gov>, in the "Additional Public Information" section, under the link labelled "21 Fund Report".

**South Central Indiana Regional Partnership Fund
(IC 4-33-12-6(c)(1)(G))**

The South Central Indiana Regional Partnership Fund ("SCIRP") provides that the IEDC receives a portion of the admissions and wagering taxes generated at the French Lick casino. These funds are to be used for the development and implementation of an economic development strategy for the region comprised of Orange County and its five contiguous counties. In the past, the IEDC deployed these funds for specific projects such as airport

enhancement and Westgate's economic center. Radius Indiana, Inc., the regional economic development organization, has been employed to apply the available SCIRP funds strategically throughout the region. During the last calendar year, all funding was designated for Radius Indiana.

**Technology Development Grant
(IC 5-28-10)**

The Technology Development Grant Fund ("TDGF") provides assistance to communities in which a Certified Technology Park has been established. TDGF awards may be used to offset capital or operating expenditures and must be used within the boundaries and in support of a community's Certified Technology Park. In recent budget cycles, there have been no new appropriations for this program. During the last calendar year, there were no new grants, loans and guarantees awarded.

**Venture Capital Investment Tax Credit
(IC 6-3.1-24)**

The Venture Capital Investment Tax Credit supports innovative new business in Indiana in certain types of industries, such as life sciences, technology, and research and product development. After a proposed business is deemed to be a Qualified Indiana Business ("QIB"), the venture capital investors are eligible for a nonrefundable tax credit equivalent to up to 20% of their investment. During calendar year 2014, there were 54 newly created QIBs that proposed to invest \$100.8 million.

GLOSSARY of TERMS:

This glossary explains the headings used in the foregoing data chart.

Project ID

Each project is assigned an identification number, as shown in this column. Each project may have more than one type of incentive. Each incentive has a Status, defined below.

Contract Year

This column shows the year that the incentive contract was signed. Incentive contracts are long-term, up to 12 years, covering an Active Term and a Post-Term Reporting period, defined below.

Recipient, City and County

These terms have their common meanings. Multicity or multicounty means that the Project is located in more than one city or county.

Fund

This abbreviation designates the source of funding for the tax credit,

grant or loan, as described in the program listing in the foregoing pages. For more detail, please refer to the program descriptions at the beginning of this report.

Base Jobs

Base Jobs is the number of employees that a company already has when the incentive contract is beginning. When the Base Jobs is "zero," it indicates that the type of project is an "attraction" project, which is one in which the IEDC has attracted a new company to the State of Indiana. When the Base Jobs is a number other than zero, it indicates the project was for an "expansion," which is when the IEDC has retained a portion of an Indiana business that could have been relocated to another State. When there is no expected increase from the Base Jobs, the project is considered to be a "retention" project. These are rare, and is one in which the State has offered incentives for a company promising to maintain significant employment and not to exit the State for a long period of time.

Contract Amount

This column shows the amount awarded for each active incentive which is in an Active Term or Post-Reporting Term Status (see Contract Status definition below). The Total Amount Awarded is the maximum amount that can be earned under the contract, which typically lasts up to 12 years.

Expected New Jobs by Contract End

This figure represents the job projection that the company promised to meet over several years. Compare to Expected New Job for the Calendar year, below, which specifies how the company "ramps up" their jobs over the course of several years.

Paid/Certified to Date

The IEDC may approve a tax credit through a certification process evaluating the recipient's performance under its contract each year. Contracts are long-term, so the Paid/Certified amounts do not include future eligibility for grant funds or certifications. The recipient may opt

use the certification to reduce its tax liability. In contrast, a grant results in a payment to a company, typically reimbursement for half of the costs associated with training Hoosiers under the SEF program. This column shows amounts paid or tax credits certified as of June 30, 2014. This column **does not** include adjustments made after the payment or certification issued, e.g., for recaptured amounts.

Recaptures

“Recaptures” will be marked as “Y” or “N” to refer to whether a recapture has occurred in the form of repayment and/or forgone credits which already issued. Usually when amounts are withheld, forgone or repaid (whether fully or partially), it is to bring the terms of the recipient’s performance into alignment with the terms of the agreement, and when this occurs, “Compliance Status” will show as “Y”. When the amount to be repaid is uncollectible, after collection processes have been determined to be unsuccessful, the Compliance Status will show as “N”.

Expected New Jobs by Recent Calendar Year

This figure represents the number of new jobs the recipient intended to hire by the end of a certain year. Recipients “ramp up” their jobs over the course of several years. If the entry is “N/A,” it is because the company did not have a job goal for that year, which may occur when a company makes investment before it hires, or the agreement is of the type not to include a job goal.

Expected Employees to be Trained

This figure shows the number of employees that the company trained, using matching grant dollars to pay for the training to improve Hoosiers workforce skills.

Expected and Actual Qualified Investment Amount

This amount is how much the recipient was expected and actually expended on capital improvements and equipment at its Indiana location. It only applies to the HBI program and

only to expected qualified investment for CReED. The “UNK” indicates that the recipient submits its qualified investment to the Indiana Department of Revenue, and the IEDC does not receive the data.

Contract Status

Incentive contracts are generally long-term, typically up to 12 years, covering an Active Term and a Post-Term Reporting period. **Active Term** means that the Company is currently eligible to earn and to be approved for incentives under a contract. **Post-Term Reporting** means that the Company is no longer eligible to be paid or certified additional funds or credits but is still required by the contract to meet job, payroll, and operational goals. These recipients are still required to report information annually. **Contract Ended** means that a company had been under contract for incentives, but the contract is no longer in Active or Post-Term Reporting periods. Contracts end for a number of different reasons. Sometimes the company may have decided not to

take incentives but performed anyway. Sometimes, the business has shut down or relocated, or the business has been acquired, resulting in review and potential action taken by IEDC compliance staff. Also, some contracts are ended when the company satisfies the terms. Once a contract ends, the IEDC cannot formally monitor the company because there is no contractual obligation requiring the company to report on its performance goals. The record in the transparency portal is removed at the end of the calendar year and is retained in this Economic and Incentives Compliance Report.

Compliance Status.

The IEDC's most commonly used incentives – EDGE, EDGE-R, SEF, and HBI – have contracts which require recipients to annually report their performance. The IEDC annually monitors performance for recipients with contracts in the Active Term or Post-Term Reporting stages. Once a contract ends, the IEDC does not formally monitor the company. A

company is noncompliant only when the IEDC has made a determination that a company has not met the terms of its contract. Because incentives are aligned with the company's performance, noncompliance is uncommon. When the IEDC is able to come to an agreement with a company about satisfying the terms of its contract, the matter is considered to be in compliance. Noncompliance usually occurs only when a company is unable to repay funds that the IEDC has determined are owed. The IEDC may decide to write off uncollectible amounts, pursue collection of grants funds or pursue tax assessment processes.
